

Description of The Celestial Ballroom

The Celestial Ballroom is a model of our Solar System with nine planets rotating & orbiting around the Sun. There are constellations of stars lighting up the background, and celestial music playing as the planets make their formation dance in the splendid atmosphere of The Celestial Ballroom. The actual model is in the Veteran's Museum in Granbury, Texas. This video is a wonderful educational resource. It also contains a testimony of God's help out of a near failure.
